The Icotherm collection

Timber roofs for conservatories
and single storey extensions

Create a room that you can use **all year-round**

Looking to upgrade a glazed conservatory roof, or need to extend your property with a room that gives you that homely feel?

The Icotherm roof solutions offer you all the options you need for a standard conservatory roof replacement or a bespoke new build to match your property. Your Icotherm roof can include Velux windows, panoramic glass panels or lanterns.

Icoroof with Velux windows

Why timber?

A **renewable** building material, timber has been used in construction for centuries, starting in the Middle Ages. Early examples include the roof frame for Saint Paul's Cathedral (17th Century). Most Romanesque buildings (1000 AD) were roofed using timber frames.

One of timber's other key benefits is that it is naturally insulating, as opposed to aluminium—which is known to be highly conductive.

Timber has a very low thermal conductivity of 0.16 W/m2k (aluminium is 205.0 W/m2k, it is very good at conducting heat and cold*).

The completed Icotherm roof offers a U-value of 0.16W/m2k (even better than an insulated house cavity wall: 0.41w/m2k**).

Key benefits

Natural insulator

Timber is naturally insulating, as opposed to aluminium, which is known to be used for similar solutions.

Premium quality materials

Icotherm select only the highest quality timber, using a premium C24 building grade material.

FSC certified

All our structural timber is FSC certified.

The Forest Stewardship Council (FSC) shall promote environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

All shapes and sizes...

Whether you are looking for a replacement or are planning a new build, you want the end result to be right for you.

Our roof can be constructed in any of the typical conservatory shapes (Victorian, Edwardian, Lean-to, Gable, Combination), as shown below.

Thanks to the flexibility in design offered by a timber solution, you can opt to have a completely bespoke room, with an Icotherm roof to match.

Combination extension layout, with Icotiles and Velux.

Roof Shapes

Edwardian

Also known as Georgian. A simple shape with a square or rectangular footprint.

Lean-to

Single pent roof, can be referred to as a sunroom. Offers clean lines.

Victorian

Multi-faceted, with 3 or 5 sides. One of the most popular styles.

Gable

Modern look with a high (gable) frontage, double pitch, often aligned with the house.

Hipped lean-to

As per the lean-to, with additional side slopes to the side.

Combination

A bespoke shape unique to you, combining any of the above.

**Customise
your room**

No compromise on light

Balance comfort and space by selecting:

Natural Light

Choose to add Velux windows to the Icoroof, or select the impressive Icoview design, an alternative that seamlessly integrates full length glass panels to sections of the roof, giving you a beautiful near panoramic view of the sky.

Lighting

Ask for your roof to be designed with our unique slimline LED lights. When our LED lights are combined with a traditional plaster finish, it will ensure that your new room will look and feel just as comfortable as the rest of your home, and can be used all year round.

Authentic slate finish that enhances roof performance.

Blending in...

We can help you choose from a range of tile and fascia colours, ensuring your space will look as good from the outside as it does from the inside.

You will be able to select from a selection of lightweight tiles, all designed to blend in with your existing house roof.

We offer a range of lightweight tiles that beautifully replicate traditional stone, terracotta and slate. With a wide range of colours, your chosen tiles will match and compliment your home. In addition, your choice of fascia and guttering will provide the finishing touches. Icotherm's tiles options are UV protected as standard and have the additional benefit of being fire-rated for your peace of mind.

icoslate

icotile

Lightweight, high-grade steel with Aluzinc coating.

Edwardian room with Icoslate in Anthracite and 2 Velux Windows.

Choose from a wide range of **internal & external finishes, lighting and windows**

1,000's of families and counting...

“ Our old conservatory was difficult to heat in winter and like a greenhouse in summer. Our Icotherm roof has completely transformed our conservatory to the room we've always wanted. We fully recommend an Icotherm upgrade. ”

Mr & Mrs Laverty
Icotherm Customer

How does it work?

Cross section

The Icotherm roof systems have been designed specifically to offer a lightweight, highly insulated solution, that is fast to install to ensure minimum disruption to your home, especially important if you are replacing a glazed roof.

Use the table below to **select the best roof option for you:**

| |  icorooftm Standard pitched roof, with the option of adding Velux windows, and select your choice of tiles |  icoviewtm For a dramatic change opt for full glass panels |  icospantm Flat roof option that can be finished off with a lantern for a prestigious looking orangery |  ico600tm If you are in bungalow or cottage with a low roof line, opt for a low pitch roof |

For new single storey extensions or retrofit

Your Questions

Everything you need to know about our roof systems...

Will I be able to use my room all year round?

Yes. The addition of an Icotherm roof can make your room up to 90% warmer in winter and 70% cooler in summer whilst enjoying the benefits of reduced noise pollution, no solar glare and extra privacy.

Is condensation a real issue?

The Icotherm roof is designed specifically to be ventilated. Combined with the fact that it uses timber, which has low thermal conductivity, results in a low u-value and approval in a low condensation risk analysis.

How long will it take to complete the work?

Whilst no installation is the same, an average conservatory roof upgrade is completed within 2-3 days. In most cases secure and weather-tight in the same day.

Do I need Building Control?

Icotherm roofs are fully compliant to building control regulations. In some circumstances building consent may not be required, however Icotherm recommend you check with your local building office. Icotherm is a leading design system approved by a number of building inspectors to simplify the building certificate process.

Will the roof be too heavy for my existing frames?

No. An Icotherm roof is only marginally heavier than a glass roof. In keeping with Government Guidelines, if the structure shows no signs of distress, the existing foundations are likely to be adequate to carry the small additional loadings. It is also important that existing windows and doors frames are reinforced.

Will an Icotherm Roof match my house?

Icotherm specialise in bespoke design offering customers a range of both internal and external finishes to provide a matching solution for your home.

Will my internal room feel darker?

A tiled roof will ensure you lose the permanent glare and heat / cold spikes. A small reduction in light will follow, but you can opt to have Velux windows fitted to compensate

Will the roof be strong enough to stand on to clean windows?

Providing all Health and Safety procedures are followed, the roof structure is strong enough to stand on. We recommend the use of a board or suitable covering to protect the tiles.

My Icotherm roof...

Genuine product

All Icotherm roofs are stamped so that you always know you are getting a genuine Icotherm made product.

10 years guarantee

Your installer receives a 10-year manufacturer warranty against manufacturing defects.

Fully approved

The Icotherm system is compliant with Building Regulations. When you choose an Icotherm roof you do so with the assurance that your room will be building inspector approved.

Thermally efficient

The Icotherm roof helps maintain optimum temperature in the room, protecting from the summer heat and retaining warmth in winter.

Speedy installation

Pre-fabricated roof modules ensure speedy installation and minimum site disruption.

Customisable

Design a room unique to you with a choice of internal and external finishes, lighting and roof glazing.

Tested & approved

Structurally approved by specialist engineers.

Building control compliant

Your installer receives a 10-year manufacturer warranty against manufacturing defects.

Eco-friendly timber

Sustainably sourced timber, making for the ultimate green building solution.
